DATE NOV 19 2008

RECD. NOV 19 2008

To: California Energy Commission

Subject: Suggested Change to final update of 2008 Integrated Energy Policy Report

From: Edwin D. Sayre

Chairman, Advocates for Clean Responsible Energy

218 Brooke Acres Drive

Los Gatos , CA 95032

Phone 408 356 2769

It is suggested that a change to Chapter 4 Recommendations as indicated in the attachment be made in the final report update. If the study is done members of the Advocates for Clean Responsible energy, (ACRE) who are scientists and engineers with decades of experience in nuclear power are willing to provide technical input for the study at no cost to the CEC.

Edwin D. Sayre

Chapter 4 Recommendations

- CEC should work with CPUC to develop plan for reviewing the costs and benefits of nuclear plant license extensions, scope of evaluation, and the criteria for assessment

CEC should work with nuclear power experts to complete an evaluation of the addition of nuclear power to meet the future needs of California and its benefits to the environment and the economy
